(In the space provided below, please explain in detail the reasons for the delay in filing a proper reply)

On July 5, 2007, Larry G. Brown, Applicants' attorney, gave authorization to the Examiner for an Examiner's Amendment, which was contained in a Notice of Allowance mailed on August 24, 2007. Upon receiving the Notice of Allowance, Mr. Brown noticed that the amended claim language in the Notice of Allowance was slightly different from the language agreed to during the July 5, 2007 interview. Mr. Brown contacted the Examiner, and the Examiner eventually agreed to issue a Supplemental Notice of Allowability, which was mailed on November 14, 2007 and contained the agreed-upon claim language. Applicants were under the impression that the issue fee for the Supplemental Notice of Allowability was due three months from the mailing date of the Supplemental Notice of Allowability. Indeed, the Supplemental Notice of Allowability notes a three months time period for the Applicants to respond to the Supplemental Notice of Allowability. Applicants paid the issue fee on December 17, 2007. Applicants, however, subsequently received a Notice of Abandonment for failure to pay the issue fee for the first Notice of Allowance. The Notice of Abandonment was mailed on December 19, 2007. Applicants request that the Notice of Abandonment be withdrawn and that the issue fee paid on December 17, 2007 be applied to the issue fee due in view of the mailing of the Supplemental Notice of Allowability and that the issued patent contain the language set forth in the Supplemental Notice of Allowability.

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 142 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 142 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, Applicant's submission filed April 19th, 2007 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Larry G. Brown on July 5, 2007.

IN THE CLAIMS:

Claims 1, 8, 12, 19, and 23 have been amended as follows:

1. (currently amended) A method of providing information about a communications device, comprising the steps of:

establishing a communications connection between a first mobile communications unit and at least a second mobile communications unit; and

Application/Control Number: 10/733,616
Art Unit: 2617

Page 3

once the communications connection has been established and during the established communications connection, periodically transmitting from the first mobile communications unit to the second mobile communications unit a condition of at least one operational parameter of the first mobile communications unit, wherein the condition of the operational parameter provides an indication as to the ability of the first mobile communications unit to maintain the communications connection with the second mobile communications unit to periodically inform a user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit, wherein said informing step comprises the step of informing the user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit by at least one of displaying at least one icon, broadcasting at least one audio tone or causing the second mobile communications unit to vibrate, wherein the icons, audio tones and vibrations correspond to the transmitted conditions of the operational parameters of the first mobile communications unit.

8. (currently amended) The method according to claim 1, wherein the icons, the audio tones and the vibrations are distinguishable from any second icons, audio tones and vibrations that are used to display, broadcast and inform a user of a condition of operational parameters of the second mobile communications unit.

Application/Control Number: 10/733,616
Art Unit: 2617

Page 4

12. (previously presented) A system for providing information about a communications device, comprising:

a first mobile communications unit having at least one operational parameter; and

a second mobile communications unit, wherein a communications connection is established between the first and second mobile communications units and once the communications connection is established and during the established communications connection, at least one condition of the operational parameters of the first mobile communications unit is periodically transmitted from the first mobile communications unit to the second mobile communications unit,

wherein the condition of the operational parameter provides an indication as to the ability of the first mobile communications unit to maintain the communications connection with the second mobile communications unit, wherein the second mobile communications unit has a user interface for periodically informing a user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit,

wherein the user interface is a speaker, a display or a vibrator motor,
wherein the second mobile communications unit informs the user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit by displaying at least one icon on the display,
by broadcasting on the speaker at least one audio tone or by generating a vibration

Application/Control Number: 10/733,616
Art Unit: 2617

through the vibrator motor, wherein the icons, the audio tones and the vibrations correspond to the transmittted conditions of the operational parameters of the first mobile communications unit.

19. (currently amended) The system according to claim 12, wherein the icons, the audio tones and the vibrations are distinguishable from any second icons, audio tones and vibrations that are used to display, broadcast and inform a user of a condition of operational parameters of the second mobile communications unit.

23. (currently amended) A method of providing information about a communications device, comprising the steps of:

establishing a communications connection between a first mobile communications unit and at least a second mobile communications unit; and

once the communications connection has been established and during the established communications connection, periodically transmitting from the first mobile communications unit to the second mobile communications unit a condition of at least one operational parameter of the first mobile communications unit to inform a user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit,

wherein the condition of the operational parameter provides an indication as to the ability of the first mobile communications unit to maintain the communications connection with the second mobile communications unit to

periodically inform a user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit, wherein said informing step comprises the step of informing the user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit by at least one of displaying at least one icon, broadcasting at least one audio tone or causing the second mobile communications unit to vibrate, wherein the icons, audio tones and vibrations correspond to the transmitted conditions of the operational parameters of the first mobile communications unit.

Claims 7 and 18 are cancelled.

Allowable Subject Matter

3. Claims 1-6, 8-17 and 19-24 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art fails to teach or suggest directly or indirectly the limitation, "periodically transmitting from the first mobile communications unit to the second mobile communications unit a condition of at least one operational parameter of the first mobile communications unit to inform a user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit, wherein the condition of the operational parameter provides an indication as to the ability of the first mobile communications unit to maintain the communications connection with the

second mobile communications unit to periodically inform a user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit, wherein said informing step comprises the step of informing the user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit by at least one of displaying at least one icon, broadcasting at least one audio tone and causing the second mobile communications unit to vibrate, wherein the icons, audio tones and vibrations correspond to the transmitted conditions of the operational parameters of the first mobile communications unit", in combination with other limitation of the independent claims 1, and 12 and 23.

The applicant has described the process notifying the user of a second mobile unit user about the operating conditions of a first mobile unit by periodically transmitting from the first mobile unit to the second mobile unit a conditional operational parameter of the first mobile unit so that the user of the second of mobile unit can be actively notified via a display unit, vibration means or icon means about the conditional parameter of the first mobile communication unit where the conditional operational parameter provides an indication as to the ability of the first mobile unit to maintain the communication connection with the second mobile communications unit.

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, Applicant's submission filed April 19th, 2007 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Larry G. Brown on July 5, 2007.

IN THE CLAIMS:

Claims 1, 8, 12, 19, and 23 have been amended as follows:

1. (currently amended) A method of providing information about a communications device, comprising the steps of:
 - establishing a communications connection between a first mobile communications unit and at least a second mobile communications unit; and

Application/Control Number: 10/733,816
Art Unit: 2617

once the communications connection has been established and during the established communications connection, periodically transmitting from the first mobile communications unit to the second mobile communications unit a condition of at least one operational parameter of the first mobile communications unit, wherein the condition of the operational parameter provides an indication as to the ability of the first mobile communications unit to maintain the communications connection with the second mobile communications unit to periodically inform a user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit, wherein said informing step comprises the step of informing the user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit by at least one of displaying at least one icon, broadcasting at least one audio tone and causing the second mobile communications unit to vibrate, wherein the icons, audio tones and vibrations correspond to the transmitted conditions of the operational parameters of the first mobile communications unit.

8. (currently amended) The method according to claim 1, wherein the icons, the audio tones and the vibrations are distinguishable from any second icons, audio tones and vibrations that are used to display, broadcast and inform a user of a condition of operational parameters of the second mobile communications unit.

Application/Control Number: 10/733,616
Art Unit: 2617

Page 4

12. (previously presented) A system for providing information about a communications device, comprising:

a first mobile communications unit having at least one operational parameter; and

a second mobile communications unit, wherein a communications connection is established between the first and second mobile communications units and once the communications connection is established and during the established communications connection, at least one condition of the operational parameters of the first mobile communications unit is periodically transmitted from the first mobile communications unit to the second mobile communications unit,

wherein the condition of the operational parameter provides an indication as to the ability of the first mobile communications unit to maintain the communications connection with the second mobile communications unit, wherein the second mobile communications unit has a user interface for periodically informing a user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit,

wherein the user interface is a speaker, a display or a vibrator motor,
wherein the second mobile communications unit informs the user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit by displaying at least one icon on the display,
by broadcasting on the speaker at least one audio tone or by generating a vibration

through the vibrator motor, wherein the icons, the audio tones and the vibrations correspond to the transmitted conditions of the operational parameters of the first mobile communications unit,

19. (currently amended) The system according to claim 12, wherein the icons, the audio tones and the vibrations are distinguishable from any second icons, audio tones and vibrations that are used to display, broadcast and inform a user of a condition of operational parameters of the second mobile communications unit.

23. (currently amended) A method of providing information about a communications device, comprising the steps of:

establishing a communications connection between a first mobile communications unit and at least a second mobile communications unit; and
once the communications connection has been established and during the established communications connection, periodically transmitting from the first mobile communications unit to the second mobile communications unit a condition of at least one operational parameter of the first mobile communications unit to inform a user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit,

wherein the condition of the operational parameter provides an indication as to the ability of the first mobile communications unit to maintain the communications connection with the second mobile communications unit to

periodically inform a user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit, wherein said informing step comprises the step of informing the user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit by at least one of displaying at least one icon, broadcasting at least one audio tone and causing the second mobile communications unit to vibrate, wherein the icons, audio tones and vibrations correspond to the transmitted conditions of the operational parameters of the first mobile communications unit.

Claims 7 and 18 are cancelled.

Allowable Subject Matter

3. Claims 1-6, 8-17 and 19-24 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art fails to teach or suggest directly or indirectly the limitation, "periodically transmitting from the first mobile communications unit to the second mobile communications unit a condition of at least one operational parameter of the first mobile communications unit to inform a user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit, wherein the condition of the operational parameter provides an indication as to the ability of the first mobile communications unit to maintain the communications connection with the

second mobile communications unit to periodically inform a user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit, wherein said informing step comprises the step of informing the user of the second mobile communications unit of the conditions of the operational parameters of the first mobile communications unit by at least one of displaying at least one icon, broadcasting at least one audio tone and causing the second mobile communications unit to vibrate, wherein the icons, audio tones and vibrations correspond to the transmitted conditions of the operational parameters of the first mobile communications unit", in combination with other limitation of the independent claims 1, and 12 and 23.

The applicant has described the process notifying the user of a second mobile unit user about the operating conditions of a first mobile unit by periodically transmitting from the first mobile unit to the second mobile unit a conditional operational parameter of the first mobile unit so that the user of the second of mobile unit can be actively notified via a display unit, vibration means or icon means about the conditional parameter of the first mobile communication unit where the conditional operational parameter provides an indication as to the ability of the first mobile unit to maintain the communication connection with the second mobile communications unit.
